

Thank You For a Great Wild Night!

We are blown away by the level of support given during this year's gala! Thanks to you, Wild Night 2021 was a great success. Greenwood was able to raise a net profit of over \$141,000 for the more than 3,700 wild animals we've assisted so far this year.

We couldn't have done it without you.

Thank you from all of us at Greenwood!

A Release Montage of Some of This Year's Patients

Wildlife Story

Several community members grew concerned for a juvenile Red Fox that was spotted in Boulder. Her eyes, ears, and rump had crusted over, and was beginning to show signs of severe emaciation. Luckily, local animal control was able to capture the fox for treatment. The ailment hindering this young animal is called mange. Tiny parasitic bugs induce fur loss that can lead to a host of other symptoms.

This fox came to Greenwood in rough shape, but our experienced staff were hopeful and got to work. They set up one of our enclosures with hay, water, and a

hearty meal. They brought the feisty critter into the pen, drew blood for testing, and treated her dehydration with fluids.

Over the course of a few weeks, the fox got several medicated baths to treat her mange along with pain reducers and plenty of nutritious eats. Now her fur is starting to grow back, and she's gaining much-needed weight. Before long, she will be strong again, ready for the wild.

This image was taken before medical care. We hope to update you with a photo of the fox looking bright-eyed and healthy after her treatments are complete!
